1st Cerebral Palsy of NJ - Remote Learning Plan

Prior to creating a schoolwide plan for distance learning, we conducted a technology assessment survey with our families. In the event of a prolonged school closure, we are currently prepared to provide our families with individualized and differentiated instructional and therapeutic materials. Families will also be instructed to complete and return a daily attendance form along with any assignments. All school staff will be available remotely to answer any questions and provide assistance daily between the hours of 9:00am – 1:00pm.

Classroom Instruction:

Each student will be given a packet of grade appropriate materials to complete at home. The daily activities cover all core subjects and include concepts such as: ELA, Vocabulary Acquisition, Word Study Skills, Writing, Math, Science, Social Studies, Health & P.E., Fine Motor and Craft Activities.

Related Services:

Included in each student's packet is an individualized home therapy program created by that student's therapy team. Items may include: Sensory Diets, Home Exercise & Activity Programs, Feeding Exercises & Strategies, Self Help Checklists, Speech & Language Games, and Functional Academic & Fine Motor Ideas.

Meal Services:

All families and case managers were notified that the sending school district would be responsible for providing meals to those students that qualify. A resource sheet is posted on the school's website.

Upon return from an extended closure, we will work closely with our families and district staff to determine whether a student needs compensatory services to make up for any skills or services that may have been lost during the school's closure.

Thank you for your district's support and cooperation during this unique time. Please contact our school for any clarification or further questions.

Keith Rygiel
Principal
